Relevant Experience

Software Developer @ Mobile Programming LLC

Sept 2018 - Present // Pune

01. Business Workflow Nov 2019 - Present // Pune

Client **BMC** | Domain **Cloud Platform**

BMC Helix Business Workflows is a modern case management solution built for lines of business, including HR, facilities, and other groups—in a scalable, managed, and automated way.

I am creating web components here by using [Angular 9](#) which is using fully modern approach of [ES6](#), maintainable, production cable and almost bug free code

02. Solidedge Sept 2018 - Nov 2019 // Pune

Client **SIEMENS** | Domain **Product Life Cycle**

Solid Edge delivers cloud-ready design – on your terms. Solid Edge delivers the cloud capabilities you need, by providing easy access to professional 3D CAD across different devices, instant configuration of your CAD environment to your personal preferences, and the ability to quickly share your data across your design resources and with suppliers and customers

Basically am here creating reusable, performant, and robust code in [Vue Js](#), [Node Js](#), [MongoDB](#) adding support for 3D rendering of CAD files, edit and save facility, CICD pipeline creation.

System Engineer @TCS

Feb 2016 - Sept 2018 // Navi Mumbai

01. Swayam Dashboard Feb 2016 - Sept 2018 // Navi Mumbai

Client **STATE BANK OF INDIA** | Domain **Core Banking Solution**

Swayam Dashboard is a Self passbook printing machine installed in SBI ATMs. So we have to create a dashboard which will analyse the number of persons printing passbook from Swayam machine to no of people printing passbook from the bank itself (manually).

My job is to create this dashboard by using [Angular js](#), [jQuery](#), [Perl](#) for backend language to create data in JSON format from text files. And to create sub dashboard which will calculating the Penalty on Swayam Machine vendor if machine is down for certain time.
